

Setting up your BibleBox

(side option Switch settings – make sure the option switch stays on WISP)

Adding Shared files to the USB

1. Plug the USB drive into your computer
2. On the USB browse to the **Librarybox > Shared** folder
This Shared folder is where you put files to be browsed from the BibleBox.
3. Inside the Shared folder are five other folders:
 - audio, images, software, text, video

4. these folders are linked by the the following browser buttons in BibleBox.
 - Books = text
 - Audio = audio
 - Video = video
 - Images = images
 - Apps = software
 - All Files = Shared
5. Put your files for sharing in the relevant folder on the USB
6. If a file is just put in the Shared folder it will be listed when clicking the "All Files" link in the menu bar
7. When copying is finished, Eject the USB and place it back in the BibleBox
8. Turn the BibleBox power switch to ON
9. Connect your wifi device to the wifi SSID "BibleBox files"
10. Go to any http website and the BibleBox website on the USB will load
11. Browse the file locations, open, view, download
